

PRO Hermosa Thread **HARD**

PDO (Polydioxanone) thread- A revolutionary new treatment in the world of aesthetics.

Format: 4ea/ pack

A revolutionary new treatment in the world of aesthetics. Newly produced collagen and elastin help to regeneration and restoration of the young face.

Professional Korean Product

Detailed description Hermosa Thread HARD

HERMOSA Thread made of PDO (Polydioxanone) thread is a revolutionary new treatment from Korea in the world of aesthetics. After insertion of the Threads, humane immune system reacts to it and starts to create collagen and elastin. Newly produced collagen and elastin will help to restore the young face.

HERMOSA Thread HARD is officially CE certified and has a unique asymmetric structure which allows to effectively reach the desired result. Evenly distributed barbs around the threads is the most important aspect of a high quality lifting thread. In order to keep the necessary thickness of the thread, these barbs are placed around the thread in 360° in the grip part of the thread and 180° in the retention part.

Product specifications Indications

- 360° Distributed COGS
- Double effect on collagen stimulation
- Absorbable
- V-Shaped Face
- Bi-Directional Cogs

Area of use

- Face

Format

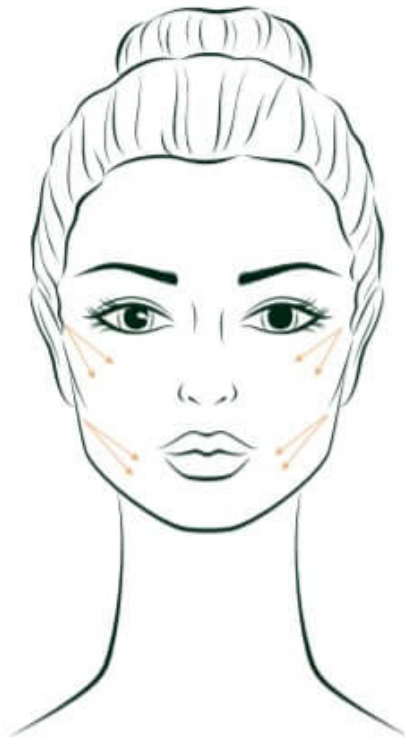

Needle Gauge: 19G
Needle Length: 100
Thread Length: 150

Manufacturer

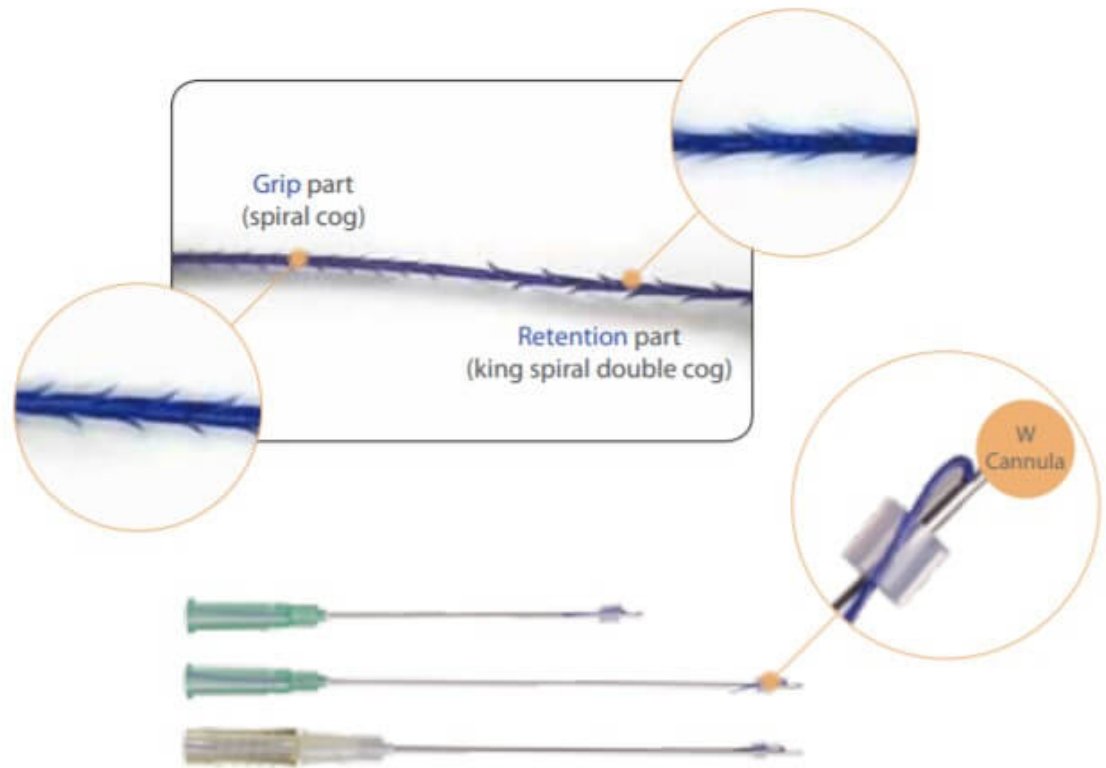

Novepharma Inc.
