Applicable only by a specialized professional

It brightens up the skin tone and improves micro wrinkles with water supplement within the skin.

Professional Korean Mesotherapy Product

Detailed description Kiara Reju 2.2ml x 3 syringes- Skin Booster

The Korean skin booster **Kiara Reju** is the solution for the shine and regeneration of skin completed with PDRN and Hyaluronic Acid. It is not only for the moisture, but also for a clear effect by filling the moisture from inside of skin.

- **PDRN** (PolyDeoxyRiboNucleotide) is the core of Anti-Aging (DNA ingredient)

- **HA** (Hyaluronic Acid) is an ingredient that naturally exists in human body as a component of cell and substrate.

This combination is the strongest skin moisturizing and regeneration facilitating solution that can simultaneously:

1. boost proliferation of multiple growth factors
2. regenerate wounded skin with the activation of micro circulation
3. recover skin elasticity and moisture supplying.
