- High viscoelasticity
- Long duration

Professional Korean Product

Detailed Description QT Fill Plus SUB-Q- Dermal filler 1ml x 1

QT Fill Plus is a Korean Hyaluronic Acid (HA) filler with maximized safety, convenience and effectiveness based on an innovative procedure. The Ultra High Density technology (UHD) follows two steps in production.

STEP 1: Chemical HA cross-linking, minimizing BDDE,

STEP 2: Physical HA cross-linking

QT Fill Plus fillers are divided into 4 types of dermal fillers: AQ, FINE, DEEP, and SUB-Q, depending on the viscoelasticity. It can be applied on the entire face with the appropriate type of product depending on the application area, the required amount and the desired treatment direction.
