

# ANEMOESA Soap De-Make Up

Soap with black coconut carbon

**Volume: 50gr**

Ideal for removing make-up  
Deep cleansing, detoxification

Greek Cosmetic Product

Detailed description ANEMOESA Soap De-Make Up 50gr

Activated carbon is a fine, odorless, tasteless, black powder, which has been heated in a controlled environment and in a vacuum and thus acquires a porous surface. Due to the porous surface it has a high absorption capacity, absorbs toxins, heavy metals, bacteria and pollutants and cleans the contact surface in depth (pH range: 9-10.5).

It has extra cleansing properties, with intense foaming, is produced with skin-friendly materials and also contains natural surfactants.

\*DERMATOLOGICALLY TESTED • PERFUME FREE
